Comment(1) Print Forward

Bangalore: Founded in 1996, French company ORME, a specialist in signal and image processing, is set to enter the Indian market. ORME which performs customized service assignments will take part in Testing Expo India trade show 2010 (February 2nd to 4th) in Hyderabad. Its assignments vary from studies of new algorithm methods to the production of systems and software for signal and image acquisition and processing.

ORME has developed two software applications devoted to measurement analysis which includes, TrackImage and TrackReport. While TrackImage performs automatic image sequence motion analysis, TrackReport performs signal and test report analysis. The company offers training to signal and image processing technicians and engineers and training sessions devoted to its TrackImage and TrackReport products.

ORME's customers include AIRBUS, EADS, Snecma, CNES, Renault SA (France, Romania and Korea), PSA, Bosch and L'Oreal among others. The company will take part in the Automotive Testing Expo to be held in June, in Germany.
